ATTENTION STOCKHOLDERS

HOMER UNION PETROLEUM COMPANY

OFFICE 2110 F. & M. BANK BLDG.
FORT WORTH, TEXAS

October 16, 1922.

From A. R. Ekman, Trustee

Dear Stockholder:

The letter-documents herewith enclosed carry a double message of great importance to you. For some time you have been awaiting reports from your company, but during the passing months all business has undergone periods of hardship. For this reason, your company has had little to report. Perhaps you have not understood our long silence, but as your friend, I have worked for your interest and for your ultimate profit.

That you may understand the present status of your company and the new trend of affairs, which, in your interest, I am endeavoring to direct, a frank statement of previous difficulties and the good news of the coming prospects must be made. The company organized and quickly secured important acreage at a time when oil properties, like other values, reached the peak of inflated prices. Later, during the disastrous depression, there came a great and sudden deflation. Property previously valuable became a liability. Without reserve capital the company could not acquire new or develop old properties, nor sell at any price; hence the inaction. Hard times continued, banks failed, credits froze, railroads, oil and other securities went to zero - then there came a business revival, a period of mergers and consolidations followed, the success of which proved that small companies like yours, must in self defense, combine with a larger organization.

With this unfortunate trend in the affairs of your company, I sent to all stockholders a letter suggesting that the Homer Union Petroleum Company combine its interest with some larger company. The response was prompt and almost unanimous. With proxies and written instructions to hand from all stockholders who have the good of the company at heart, I have sought ways and means to protect the interests of stockholders. After investigating every possible opportunity to better the position, I have made an agreement very much to your advantage. It is because I believe in the future of oil and in the future of the great states of Texas, Oklahoma, Arkansas and Louisiana, which states are now producing about one-third of the World's supply of oil, and above all, because I believe in the future of the plan as herein outlined, that I have arranged for you to enter Petroleum Producers' Association, and I feel assured that when you convert your stock into Association shares as hereinafter provided, your original investment will be well placed, and thereafter you will be in a position for the double profit always possible in oil.

This Association was founded by its President, Frederick A. Cook, petroleum technologist, who has devoted all of his time during the past ten years to the task of seeking for and developing new oil fields. The Sec'y-Treas. is F. K. Smith, an aggressive

expert in finance. The Vice President and Superintendent of field operations is T. O. Turner, one of the best known field managers of the Southwest. Turner began years ago drilling successfully the new fields of Ohio. Soon after, the oil lure of California placed him with the Royal Dutch-Shell Co. Later as the Wyoming area developed, Turner did valuable service with Midwest Company, one of the Standard subsidiaries. Thus with a wide range of experience Turner assumes charge of the drilling and production.

Many companies have joined this consolidation, and since most of these companies were successful organizations with a number of producing wells and other valuable properties, it would seem that our interests are well protected, for your certificate when sent in and re-issued in the Association will stand against rapidly increasing assets and ever growing wealth from other sources, out of all of which you will be entitled to and will receive your share of profits. In securing this advantage I have acted for you as I would for myself.

Petroleum Producers' Association, therefore, which you enter by the agreement herein outlined, has acquired great values from the merging companies, and other sources, but these assets cannot be listed until the limited merger transactions are completed. The Association has an income from nearly one hundred wells already drilled, which is equal to a yearly dividend of 25% on all stock sold. Furthermore, the organization has acreage, proven and prospective - of great potential value, in most of the active oil fields of the Southwest. By way of precedent you should keep in mind that the Associated Company organized years ago under the same plan as Petroleum Producers' Association - now controls one-third of the oil of California. When you convert your present certificates into Association shares, you will get in return dividend earning stock.

The conditions under which your stock will be re-issued is covered by the enclosed letter. We urge upon you the importance of sending in your certificates with the remittance required promptly. Delay will be unfortunate for your company has already waited too long to develop the oil lands. Immediate drilling activities are desirable, but no new efforts can well be undertaken until the consolidation is completed. We ask, therefore, that you give quick helpful co-operation by sending back your certificate for exchange in the Association.

In your reply mention
name of your Company.
Address all letters to
2110 F. M. Bank Bldg.
Fort Worth, Texas.

Sincerely yours,

Trustee for Stockholders
of Homer Union Petroleum Company

ATTENTION STOCKHOLDERS

HOMER UNION OIL COMPANY

OFFICE 2110 F. & M. BANK BLDG.
FORT WORTH, TEXAS

September 25th, 1922.

Dear Stockholder:-

To receive the benefit of the important news contained in this letter an immediate reply is necessary. You have been loyal supporters of our Company; through your valued assistance a foundation was laid for a promising organization, but the business depression and financial stringency forced a halt in all lines of industry. We spent our funds in an honest endeavor to develop our properties. We want you to get a good return on your investment, and we want you to have a voice in a proposed change in the affairs of your company. The object of this letter is to receive from you an expression of your opinion on the proposition outlined below, for this purpose I have been appointed as Trustee.

In glad spirit of the present business revival it is desirable to adjust the affairs of your company. We must renew activities with fresh vigor. The oil industry is making huge profits for others - Texas produces one-fifth of the world's supply of oil, but your company, because of a lack of reserve capital, is doing nothing to save its potential values. Further inaction will be disastrous to your investment as a stockholder. For some time local shareholders and others interested in the welfare of the company who are familiar with the immense wealth coming out of the oil fields, have sought for ways and means to combine the interests of our company with some strong successful organization. We now have an opportunity to do this by a proposed consolidation with the Petroleum Producers' Association. Under this plan you will at once get an interest in a large number of wells already drilled.

You will hear much - very much - during the passing year of economic readjustments, of mergers, consolidations, and various combinations of business interests. Times have changed, and unless we meet this change, the rapid current of events will leave us behind. Without ample finances a Company like ours can no longer exist when in active competition against large and ever-growing Corporations. We must combine as others are doing, or take the hard consequences.

This getting together movement was first put to a telling test by the earlier master-minds of the oil industry; those who fought it and lost. The great wealth and power of the Standard Oil Company is the indisputable answer to the wisdom and prudence of merged business interests. The entire industrial world is being recast to fit the present needs in man's economic endeavor, and instead of fighting this change, let us work with the current, and thus profit by the moving stream. It is because I know and understand this coming force of circumstances that I am urging a merger for our Company.

If we do not enter Petroleum Producers' Association or some other combination of this kind, it will be necessary to launch a new campaign to finance the purchase of new properties and the drilling of some wells. Since this is a very difficult task at this time, I strongly recommend the merger as above outlined.

Kindly sign the enclosed proxy, write us - fully and frankly - just what you would like us to do. A prompt reply will be an advantage to our common interest.

Sincerely yours,

By [signature]
Trustee.

WEST ALLIS 14, WISCONSIN

June 9,1947

Mr. W. E. Goebel
Box 141
Belen, N. Mexico

Dear Sir:

I am sure that you have received your connecting rod by this time, because it went forward to you by Parcel Post COD on June 3rd.

I cannot quite determine the difficulty you are having with the seeder, because we have had very good reports on that. This is the first year that we have used that seeder in any great numbers. It has been experimented with our Company for a long time, before it was ready. We decided to put it on the market now, rather than waiting any longer, because it had been accepted so well.

I am sorry that you are having this trouble, and if we can be of service to you in any way, please let me know. If your plow and disc harrow had not already gone forward to you, they will be very promptly, because they are filling all orders in according to the sequence in which they were received, and filling them as promptly as they can.

Yours very truly,

For More Than 20 Years

81st and Burnham Streets

WEST ALLIS 14, WISCONSIN

September 5, 1946

Mr. W. E. Goebel
Box 141
Belen, New Mexico

Dear Sir:

We are in receipt of your letter and you are quite right in that we did not list the #120A planker hitch as we do not make them any more and do not know for sure when we will.

The planker hitch was merely a small piece that you would use with your own hand made planker. If you make yourself a planker, you can use either chains or use two very simple standards to pull it with.

At the present time I cannot tell you what the price of a Columbia Seeder would be because we do not anticipate having any of them for the remainder of this season nor for next season. They have been around $30. We do not anticipate using the fertilizer attachment any more at least until some of the regular seeder companies can decrease their prices somewhat. We will have a very convenient and a very good seeder on the market around January 1 that will sell around $30 or $33 and it has everything that you would want in a small seeder with the exception of a fertilizer attachment. This seeder can be very easily used on a multiple hitch if you would like to use two or three seeders on your tractor instead of one. All the seeders that we use are made so that you can use any kind of seed that you prefer.

We do not make the riding attachment. It is shown in some of our old catalogs but they have not been made for about six years.

We will do everything possible to push your order through, but it will be impossible to ship for at least from three and a half to four months from the date that you entered it, which is the 15th of August. Thank you very much for your interest and you can rest assured that we will give you the best service we possibly can.

Yours very truly,

PIONEER MFG. CO.

R. E. DOHMANN, Sales Mgr.

WEST ALLIS 14, WISCONSIN

Aug 15/46 #12

August 6,1946

Mr. W. E. Goebel
Box 141
Belen, New Mexico

Dear Sir:

Thank you very much for your order for one #11A Red E Garden Tractor.

We thought that we would be in a position to make the #11 Tractors by now, but as yet, we cannot do a very good job of it. We can make you a #12 5HP Tractor, and give you delivery in approximately 4 months after date of order, or sooner.

The 5HP Tractor would cost you slightly more, but it would be such a little bit, that it would not be noticeable. We do plan on being able to supply you with a 4HP Tractor sometime around December or January, but not until. The price of the #12 at the present time, is $296.48 minus 20% or $237.19 net. If you wish rubber tires, we can add $21.80 to that figure, and then the other items of equipment would be the same type and can be used on either Tractor. If you cannot wait that long for the #12 Tractor, I would like to suggest that you consider the #10 3HP Tractor. This tractor is equipped with a Wisconsin engine, and for that reason, we have been able to make pretty good delivery. The #11 and #12 engines we make ourselves, and naturally we have had a great deal of difficulty in obtaining magnetos, carburetors etc.

The #10 Tractor comes at $269.50 including rubber tires and cultivator complete. We will give you the 20% discount on this machine which would make it $215.60 net complete. If you could use this smaller tractor,

WEST ALLIS 14, WISCONSIN

November 18,1946

Mr. W. E. Goebel
Box 141
Belen, N. Mexico

Dear Sir:

I am adding to your order #T-5396 per your letter of November 9th, one 124 snow plow, the price of which at the present time is $17.95. We will be able to make shipment of this plow with your tractor. This #124 attachment can be used for plowing snow, or for very light leveling as you have mentioned.

According to the information that I can get from our production department right now, your order will be shipped within the next 3 weeks to 30 days, which means that it will be sometime around the forepart of December, but, if there is anything that we can do to make shipment sooner, we will certainly do so.

Of course, we cannot tell from one day to the next whether we will be able to do that well or not. About 4 weeks ago, we had difficulty obtaining castings for the tractor, and we went for over 2 weeks without a single casting being shipped. That put us behing considerable when anything like that happens, so please bear with us, and we will do the very best that we possibly can. Thanks very much.

July 2, 1946

Dear Sir:

Some time ago you inquired about our RED E Garden Tractors. At the time our production facilities were incapable of taking care of your order.

We have recently developed a new 3 HP RED E Tractor which we can make delivery on within one week. This model has been carefully designed and tested for the average home gardener. It comes with rubber tires and cultivator as illustrated in the attached circular.

The price of this machine is $269.50. As an introductory offer, we will allow you our discount of 20% if you send your order in before July 10th. This brings the cost down to $215.60 F.O.B. our factory. The disc is available at $21.26 less the 20% discount for immediate delivery. Many other attachments will be available for fall, winter, or spring delivery.

Order your 3 HP Model #10 RED E Tractor today. Remember that more than 25 years in garden tractor manufacturing experience is behind this machine.

Belen, N. Mexico

Dear Sir:

I am very sorry that your cultivator seems to be minus some parts. The cultivator lift was not sent out with the original shipment. That went out by Express a day or two later. Now, will you please check if you have gotten this lift yet, and then let me know exactly what parts are missing. Take a catalogue or the blue print, and check off these items, so that I will know what missing parts should be sent to you.

We will take care of you just as promptly as we possibly can after hearing from you. A 3 row seeder would be available for shipment in about 2 weeks, the price of which is $73.75. If you wish this, I would suggest that you place your order immediately because if I don't get it very soon, I may have some difficulty in getting it for you. I will be able to get the single row seeders at $24.25, but the 3 row seeder may be very difficult.

I hope that we can be of better service to you in the future.

20TH FLOOR, F.& M. BANK BUILDING

FOUNDED AS A TRUST ESTATE

Petroleum Producers Association

FT. WORTH

TEXAS

Representing Combined Oil Interests of the Southwest.

TO STOCKHOLDERS - YOUR STOCK CAN BE MADE VALUABLE

The Indian smoking the pipe of peace represents your interest and ours; the mutual desire is to get profits on investments. Let us get together in friendly and cordial co-operation. The struggle between small Companies is passing away and they are gathering about the Camp fire of Petroleum Producers' Association. United effort makes a strong Nation. The same effort forces success in an industrial organization like ours.

The preceding letter gives the reasons for entering this Association. It remains for us to outline the conditions under which your stock can be protected by being re-issued, also the advantage to you of the transaction. By the agreement herein outlined, the properties, or such values as we are able to take over and develop profitably, will be combined with those of the Association, and operated jointly for the common profit of all stockholders. By the same agreement you share with us the profits from our present and from future properties we may acquire.

The transaction is fair and of benefit to all. There will be some complaint - but do you understand the intent and the necessity of such combinations. In the present trend of business, an enlarged operating fund and a decreased expense is an absolute law to far-sighted business men. Profitable investments are thus assured; economic security is attained by union of action and combined assets. The money thus saved is the shareholders profit.

Your stock now stands against assets which have not been profitable. Such properties, however, have a potential value when more fully developed. In the present endeavor to protect and make more profitable your investment, your lot has been cast with the Association because of the advantage of greater united action, and better financial and operating facilities. The properties have not been sold to the profit or the detriment of anybody. There has been no sale, which gives an advantage to an inside group, officers or directors, or anyone else. The combined assets are still the property of the stockholders and no one has profited by the transaction ex- the stockholders. As these oil lands are developed, the profits are yours.

If you are asked to subscribe more money, it is for the purpose of building up your company, and in the end it is your property which is being developed and placed on a profitable, producing basis. Think this over, and treat your officers accordingly, for after all they simply represent your interest as best they can, and they are the losers for in mergers they usually lose their jobs.

If you will study the ups and downs of the fortunate ones who are drawing big dividends in the older oil, and other industrial corporations, you will find that each investor had the same experience in his company which you are now having, but those who held on through the difficult periods of mergers and consolidations are now the gainers. The losers were those who got cold feet and refused to "chip in" in the time of need.

Petroleum Producers Association

Petroleum now rules the industrial world. Its future is as secure as human progress. Without it no wheel can turn, no motor can drive the commercial life-blood of man. It is the vitamine that makes possible the earth's present moving animation. It is the key industry of all mankind, and to be as sociated with its development is to have a grip on the essentials of life. More actual wealth has been created, more individual fortunes have been made in the quest of this magic fluid, than in any other line of endeavor. It is for this reason that oil securities have held the center of the investment stage.

Few men ever made a fortune by the sweat of the brow. He who works with his hands alone may accumulate some money, but he seldom does. The wise worker of today who aims for comfortable wealth with which to enjoy the luxuries of later days, puts his savings to work. If your idle dollars are quickly turned into an industry which is creating new wealth, like the oil drill, your country profits, and you are piling up a possible fortune.

There comes a time in the life of every man, when to get results he must merge his driving force with others. It is likewise with oil companies. The giant power of the present wealth producing corporation is due mainly to the united initiative of earlier pioneering companies, which have in the passing years of economic hardships, merged their common interest for the common good of stockholders. Thus, following the trend of proven business prudence, Petroleum Producers' Association assumes for itself and for the safety, profit and protection of investors, the position of a family union of smaller companies.

To get the advantage of the combination in the Association, your stock must be sent to this office promptly. Under the conditions outlined below, it will be recognized dollar for dollar at par, or face value, but you will be expected to subscribe for additional shares in the Association equal to 25% of the face value of what you now hold. The par value of Association shares is one dollar. In other words, if for example, you hold shares of stock, units, or other securities of the value of $100.00 and will send us the certificate, with a check or postal order for $25.00, we will forward you a receipt certificate for 125 Association shares, and we believe this will put you in line for liberal future profits. Indeed, the Association now has an income from 88 wells already drilled, and other sources, equal to a yearly, dividend of 25% on all stock sold.

The way is now open for you to make a profit on your previous investment. You may have lost before, or you may have thought you lost, but in oil you can afford to lose five times if you win once. Here is your chance to win. By the necessary conditions of this merger, your interests and ours are combined. The opportunity is yours. We have fully explained the transaction under which we share our property with you, and you come under the protecting wing of Petroleum Producers' Association.

The enclosed blank is for your convenience. The time saved by its quick return is to your advantage.

Sincerely yours,

PETROLEUM PRODUCERS' ASSOCIATION,

Frederick A. Cook

President.

FAC/GK

LITCHFIELD MANUFACTURING CO.

BR. 6896 423 SOUTH 5TH ST. • MINNEAPOLIS 15, MINN.

May 10, 1949

Mr. W. E. Goebel
Belen, New Mexico

Dear Mr. Goebel :

We have your letter of May 6th and are very much interested in your experiment with the idler and will be glad to hear how it works out.

We are now producing a new seeder which we call the "Seedmaster", a circular of which we are enclosing. We have made many improvements over the Equa-Space, among which are the following:

1. Seeder head is removable and seed can be changed without tipping machine upside down (See illustration).

2. A felt wiper is used instead of brushes giving a much more positive control.

3. Contour gate holds seeds in disc and drops them accurately at the right spot.

4. Slot in frame makes adjustment of chain easy without changing links when different size sprockets are used.

5. Glass jar keeps seed in sight and shows when refilling is necessary.

6. Cradle gives free up and down movement to take care of irregularities in ground.

7. Handle bracket or cradle are removable so that seeder may be used as tractor drawn or hand seeder.

It is possible now that you have your Equa-Space working well that you might be able to sell it to one of your neighbors. If so, we would like to send you one of the new Seedmasters for $17.48 which is one-half of the list price, as we are anxious to get this seeder in use in all

parts of the country.

If our proposition interests you, send us your check and the new Seedmaster will go forward at once.

Yours very truly,

LITCHFIELD MANUFACTURING COMPANY

R. L. Brooks, Sec. - Treas.

Save Time • Save Money • Save Labor with SEEDMASTER
Multiple Units For Your Tractor

★ Accurately Controlled Planting

★ No Crushing or Bruising of Seeds

★ Easy Operation — Easy Adjustments

★ Made to Fit Any Tractor

The principle of the seeding mechanism is based on a design that accurately controls the flow of seeds without grinding, breaking or bruising them. The mechanism is precision built so as to insure positive planting by allowing only a specific quantity of seed to enter the disc notch. The seeds are held in the notch by a contour gate until directly over the seed drop channel where they are released into the furrow made by the plow and are immediately covered by the hiller and the ground is then packed by the pressure of the packing wheel. The felt that controls the amount of seed to enter the disc and the contour gate that controls the dropping of the seeds are so engineered with spring action as to insure against any possibility of bruising, crushing or grinding of seeds.

The planting table on the reverse side specifies the disc and the pulley (or sprocket) to be used in each planting and also specifies the approximate number of seeds that will be planted as each notch drops its seed and also the distance apart the seeds will drop in the row. 4 sprockets when chain is used are furnished and ratios of 1 to 1, 1 to 2, 2 to 3 and vice versa accomplishes the spacing desired. Where different spacing or different disbursement of seed is desired special discs and special sprockets can be furnished at a nominal charge. The same chain or belt is used in any combination, as adjustment is accomplished by moving the plow and hiller carrier forward or backward in the space provided on the frame.

The plow can be set to any depth desired up to 1½". The hiller can be permitted to float or can be made rigid by using a set screw to tighten it to the carrier.

Each disc is numbered to correspond to the planting table and can be changed from one to another without tools in less than a minute.

By loosening one screw the seeding head mechanism is taken out of the plow and hiller carrier when changing from the planting of one seed to another as shown in illustrations A and B. Be sure the correct disc is inserted before filling with seeds.

There is a tension washer furnished that is used on the drive shaft shoulder next to the seeder head. Be sure to use this with all discs. When seeding keep sufficient seed in the mechanism to cover the disc at all times. This will insure against skipping.

The table attached hereto may not meet specific requirements. For instance, in planting onions one seed is picked up by disc No. 1 and in some cases two. The seeds are dropped approximately 2 inches apart when the table formula is complied with. There are lots of growers that prefer a greater distance between plants. If a 9 tooth sprocket is used in front and an 18 tooth in the seeder there will be approximately 12 seeds dropped every 36 inches or 3" apart.

The user can make his own revision by complying with the following. On a 1 to 1 ratio—that is by using the same size sprocket in the front and in the seeder—the seeder disc will make one complete revolution every 37½", a disc with 6 notches will make 6 drops every 37½". A disc with 12 notches will make 12 drops. If the disc holds 1 seed, then 12 seeds will be dropped in a 37½" row. If half the number of seeds is preferred use the 1 to 2 ratio. If twice the number is preferred use the 2 to 1 ratio etc.

Seeds like onions and radishes can be controlled positively. Seeds such as corn and beets that do not run as uniform are more difficult. Seeds of corn will vary in size and droppings will range from 1 to 4 seeds in the hill. The standard No. 6 disc will drop on the average 2 to 3 kernels every 12½" apart on a 1 to 2 ratio of sprockets.

QUICK CASH RETURN FOR YOU

Our monthly distribution will be paid to all stockholders of record October 31st. Checks will be in the mail November 15th, 1922.

It is in a spirit of equitable co-operation that the Executive Board of the Petroleum Producers' Association favor quick dividends to investors.

This gives stockholders who have long had their money tied up in inactive, non-dividend paying stocks an opportunity to get immediate returns on the securities of any company now merging with the Petroleum Producers' Association.

Yours for friendly co-operation and quick results.

PETROLEUM PRODUCERS' ASSOCIATION.
